

EXPERIENCE THE NEXT GENERATION IN FILTER MEDIA CLEANING

INTRODUCING...

THE UNIFILT AIR SCOUR

- Proprietary, laser-cut microslits replace those outdated mesh screens that can plug up and fail
- No need to remove filter media or replace the underdrain
- A cost-effective retrofit option

- Increase Productivity
- Minimize Downtime
- Reduce Labor Costs

Get Proof of Performance before you buy!

Call and ask how you can qualify. Set-up includes temporary installation of the Unifilt Air Scour without any permanent, physical plant alterations. Our user-friendly design ensures fast, easy installation. During the Trial, air will be supplied by a mobile, diesel-powered blower. Additionally, our expert team will provide complete operator training!

Since 1977, with 4,000+ installations operating worldwide in a variety of municipal and industrial applications, we've set the standard for state-of-the-art manufacturing, distribution, removal and installation of filtering materials for potable and wastewater treatment facilities. In addition to the Air Scour, we manufacture, package and ship Anthracite Filter Media, Filter Sand, High Density Material, Filter Gravel, Wheeler Balls and Uni-Liners. Our Filter Media meets AWWA B-100 09 and NSF Standard 61. Rely on us for all your filter material system needs.
